

Python – Week 1 Assignments

Q1. Hello Program

Write a program that asks the user for their **name** and **city** and prints:

```
Hello <name>, you live in <city>.
```

Q2. Simple Calculator

Take two numbers as input from the user and print:

- Sum
 - Difference
 - Product
 - Quotient (with `/`)
 - Floor Division (with `//`)
 - Remainder (with `%`)
-

Q3. Area of Circle

Ask the user to enter the **radius** of a circle and calculate its area using:

```
Area =  $\pi \times r \times r$ 
```

(Use `pi = 3.14159`)

Q4. Even or Odd

Take an integer input from the user and check if it is **even or odd**.

Q5. Grade Calculator

Ask the user for their **percentage marks** and print grade:

- A if marks ≥ 80
 - B if marks ≥ 60
 - C if marks ≥ 40
 - D otherwise
-

Q6. Largest Number

Take **three numbers** as input and print the **largest** among them using `if-elif-else`.

Submission Guideline

- Write each program in a separate `.py` file.
- Use meaningful variable names.
- Include at least **1 `input()`** and **1 `print()`** in every program.
